# Intensive care, redefined

Presenting the next-generation compact intensive care ventilator – **Falco 202 EVO**

Offering reliable respiratory support during transit requires a ventilator that is versatile, portable, and affordable. Italy's Siare Engineering International has leveraged its 40+ years of scientific innovation to help clinicians deliver better ambulatory and intensive care with the Falco 202 EVO.

Equipped with a multitude of state-of-the-art features, it offers a plethora of advantages.

## Versatility

- Suitable for neonates, children, and adults
- Universal ventilator with invasive and non-invasive capabilities
- Advanced in-built modes

## Affordability

- Low maintenance cost
- 20,000 hours turbine warranty
- Electromagnetic flow sensor for lower TCO

## Portability

- Light weight (only 5.5 kg)
- Ergonomic design
- Easy maneuverability
