

GE Healthcare

Intensive care, redefined

Presenting the next-generation
intensive care ventilator – **Siaretron 4000**

Delivering long-term, precise respiratory support to a wide range of patients requires a ventilator that is versatile, affordable, and sleek. With that in mind, Italy's Siare Engineering International has leveraged its 40+ years of scientific innovation to manufacture the Siaretron 4000 (Turbine-driven and Gas-driven).

Equipped with a multitude of cutting-edge features, now give your ICU the power of an advanced ventilator.

Siaretron 4000
(Turbine-driven)

Siaretron 4000
(Compressor-driven)

Versatility

- Suitable for neonates, children, and adults
- Universal ventilator with invasive and non-invasive capabilities
- Advanced in-built modes

Affordability

- Low maintenance cost
- 20,000 hours turbine warranty
- Electromagnetic flow sensor for lower TCO

Sleekness

- Small footprint
- Ergonomic design
- Easy maneuverability
