Centricity™ High Acuity Platform

ENABLING YOUR DIGITAL TRANSFORMATION IN HIGH ACUITY CARE AREAS

CHALLENGE:

High Acuity Care areas are under high pressure to improve costs and drive outcomes while maintaining a high degree of compliance to established protocols. Digital transformation can be the key to providing efficiency gains in process management, and drive effectiveness in quality care and care compliance.

SOLUTION:

Centricity™ High Acuity Platform is a modern scalable, extendable, and reliable multi-tier platform to support multi-departmental and multi-hospital organization continuum across high acute care areas.

Centricity High Acuity helps to optimize the clinical workflows, improve data quality and completeness, and provide advanced analytics across departments driving your digital transformation journey.

The Centricity High Acuity Platform includes

☑ **Anesthesia** to **enhance clinical documentation** and **decision-making** from pre-operative assessment throughout the peri-operative workflow

☑ **Clinical Expertise** to help decision making process through **visualization** supported by the **Clinical Notification Module** across the care continuum. This **identifies deterioration** which can lead to clinical events and brings them to the clinician's attention through the combination of advanced rules and notification

☑ **Critical Care** to **enable clinical documentation** activities and **clinical decision support** in care units treating critical care patients

**+80** dedicated staff in Research & Development

+25 YEAR track record of providing interoperability with devices and other IT systems

gehealthcare.com

The Centricity™ High Acuity Platform optimizes the different workflows in the high acute care areas: high resolution of data from various sources are available in an intelligent way to support a more informed decision-making process. Data continuity allows to generate insightful analytics.

DATA CONTINUITY & INTEROPERABILITY

- Ensures a seamless continuity of care between pre-operative, intra-operative, post-operative and different types of critical care, and interoperability with other IT systems and +250 devices.

- Enables care providers to document and maintain a patient record that provides them with a comprehensive patient health history that is readily available throughout the continuum of care.

CARE PRIORITIZATION

Centricity High Acuity helps to identify the department and patients' needs, and provide priorities at a glance through intelligent rules and notifications to expedite the decision-making process

CLINICAL DOCUMENTATION

Centricity High Acuity is designed for highly acute care areas by clinical experts leveraging more than 25 years of experience in the market. This solution provides an integrated view of clinically relevant information from different sources, through intuitive trends, embedded protocols, multi-patient views, and assessment tools to support a complete and compliant care plan and documentation.

WORKFLOW OPTIMIZATION

Focused on Critical Care and Anesthesia specific workflows, Centricity High Acuity supports consistency of care, information handover, and care provider focus.
Through functionalities, such as Integrated Order Management, our platform helps caregivers simplify tasks and minimize documentation time ensuring adherence to compliance standards.
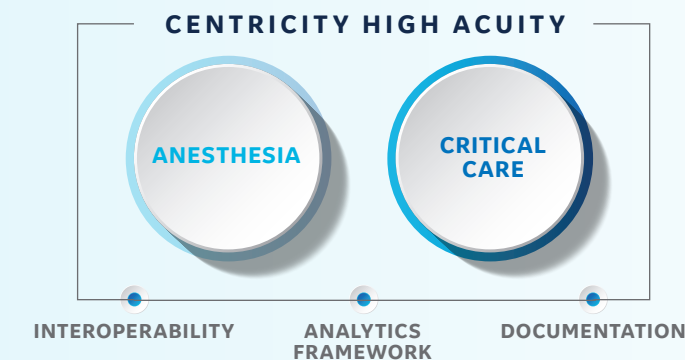

ACTIONABLE ANALYTICS

Analytics across the care continuum and by individual department help to generate insights and drive continuous improvement for clinical, operational, and financial excellence. Centricity High Acuity comes with standard dashboards which measure most relevant KPIs. Additionally, we can partner with you to define together your analytics strategy with customized metrics and dashboards.*

SCALABLE AND FLEXIBLE PLATFORM

Centricity High Acuity is a modern scalable, extendable, and reliable multi-tier platform to support multi-departmental and multi-hospital organization. Based on industry standard technologies, the platforms flexibility helps you to drive a sustainable digital transformation allowing to face different challenges and needs over time, from pandemic era to virtual care needs.
