

Care that can unlock potential

16 - 19 May, 2023

Palais des Congrès, Paris

Booth #F15, level 1

Tuesday, 16 May

12:00-14:00

ULTRASOUND

Learn by doing on edge-to-edge mitral procedure*

Learn how to acquire, optimise TTE for screening and follow-up
Learn how to guide edge-to-edge mitral repair procedure

14:00-15:00

ULTRASOUND

Fundamentals of tricuspid multi-planar reconstruction*

Learn how to optimise and orientate the 2D and 4D data set

Speaker: Dr. Ribeiro

15:00-15:50

INTERVENTIONAL

CT-guided PCI

Learn about Coronary CTA

Learn how CTA can help Interventional Cardiologists in planning and performing PCI

Speaker: Dr. Collet

16:00-16:45

INTERVENTIONAL

Exclusive : Introducing a new technique to visualize stent in 3D

Discover a new type of imaging in PCI

Discover a new intraprocedural tool for 3D reconstruction of the coronary stent

Speaker: Dr. Bouisset

17:00-18:00

ULTRASOUND

Hands-on: imaging the mitral*

Understand how you can optimise your patient management with device therapies for mitral disease

Speaker: Dr. Hammerstingl

Wednesday, 17 May

08:30-10:30

Learn by doing on edge-to-edge tricuspid procedure*

11:30-13:30

Learn how to acquire, optimise TTE for screening and follow-up

16:00-18:00

Learn how to guide edge-to-edge tricuspid repair procedure

ULTRASOUND

10:30-11:15

Exclusive : Introducing a new technique to visualize stent in 3D

15:00-15:45

Discover a new type of imaging in PCI

Discover a new intraprocedural tool for 3D reconstruction of the coronary stent

Speaker: Dr. Pellegrini, Dr. Collet

14:00 -14:50

INTERVENTIONAL

CT-guided PCI

Learn about Coronary CTA

Learn how CTA can help Interventional Cardiologists in planning and performing PCI

Speaker: Dr. Collet

Thursday, 18 May

09:30-10:20

INTERVENTIONAL

CT-guided PCI

Learn about Coronary CTA

Learn how CTA can help Interventional Cardiologists in planning and performing PCI

Speaker: Dr. Collet

10:30-12:30

ULTRASOUND

Learn by doing on edge-to-edge mitral procedure*

Learn how to acquire, optimise TTE for screening and follow-up

Learn how to guide edge-to-edge mitral repair procedure

12:30-13:30

ULTRASOUND

Fundamentals of tricuspid multi-planar reconstruction*

Learn how to optimise and orientate the 2D and 4D data set

Speaker: Dr. Ribeiro

14:00-14:45

15:00-15:45

INTERVENTIONAL

Exclusive : Introducing a new technique to visualize stent in 3D

Discover a new type of imaging in PCI

Discover a new intraprocedural tool for 3D reconstruction of the coronary stent

Speaker: D. Pellegrini, Dr. Benamer

16:00-17:00

ULTRASOUND

Hands-on: imaging the tricuspid*

Understand how you can optimise your patient management with device therapies for mitral disease

learn how to optimise and orientate the 2D and 4D data set

Speaker: Dr. Wunderlich

Friday, 19 May

08:30-09:30

ULTRASOUND

Fundamentals of tricuspid multi-planar reconstruction*

To learn how to optimise and orientate the 2D and 4D data set

Speaker: Dr. Ribeiro

10:30-11:15

INTERVENTIONAL

Exclusive : Introducing a new technique to visualize stent in 3D

Discover a new type of imaging in PCI

Discover a new intraprocedural tool for 3D reconstruction of the coronary stent

Speaker: Dr. Pellegrini

11:30-12:30

ULTRASOUND

Hands-on: imaging the mitral*

Understand how you can optimise your patient management with device therapies for mitral disease

Speaker: Dr. Hammerstingl

Symposium

3DStent: a new era in stent enhancement

Anchorperson: G. Guagliumi

Spokesperson: C. Collet

Discussants: H. Benamer, S. Brugaletta, N. Gonzalo, D. Milasinovic

Thursday, 18 May

12:15 – 13:15 (CEST)

Room 241 | Level 2

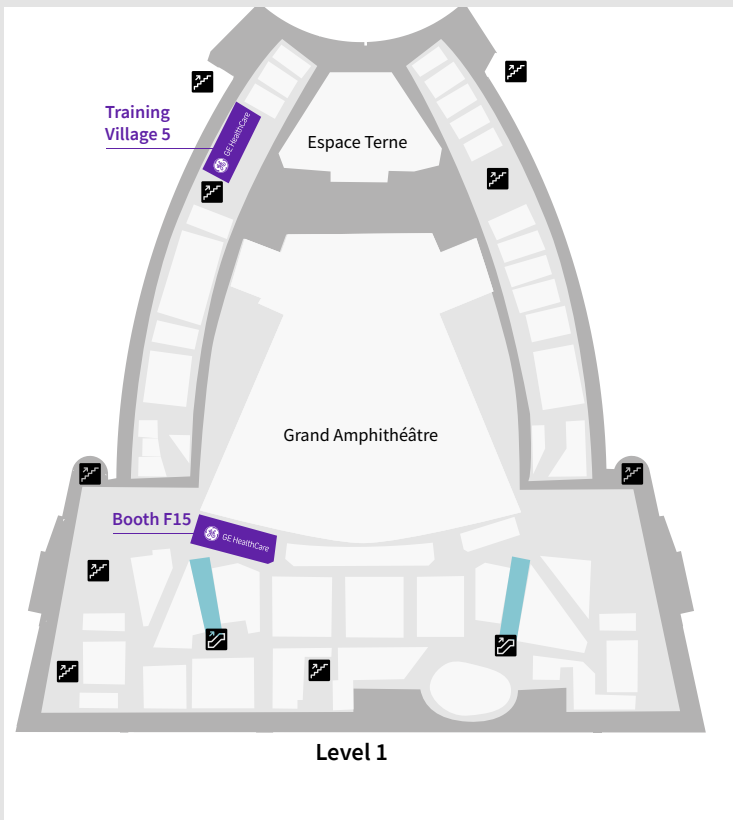

Discover a new intraprocedural tool for 3D reconstruction of the coronary stent.

Where to find us?

GE HealthCare

Booth #F15, level 1

Workshops - Training #5, level 1

Happy to meet you at EuroPCR!

Discover the full programme here and plan your EuroPCR with us!
