

GE HealthCare

Get ahead of crucial maintenance challenges

Discover the power of proactive and predictive services to help you keep your hospital humming

As a prime player in healthcare technology management, you work hard to prevent unplanned downtime and optimize medical device performance. You help your clinical partners stay productive, ensure revenue is flowing, and patients are satisfied.

But who's looking out for you, and helping you succeed?

With clinical partners, operations leaders and patients all counting on you, count on GE HealthCare. We are with you every step of the way, with proactive and predictive monitoring solutions that help you identify and resolve emerging issues before they turn into costly, stressful downtime problems for your hospital.

GE HealthCare can help you

Support clinical partners' success

Minimize equipment service disruptions and maintain excellent image quality.

Help your hospital thrive

Capture more revenue and reduce variability in maintenance costs.

Enhance patient safety and satisfaction

Keep equipment in top working order and minimize rescheduling hassles.

GE HealthCare has a suite of monitoring solutions by your side

Proactive

Predictive
OnWatch™ Predict Tube Watch™

Reduce unplanned down-time¹

+4.5 days per year of increased uptime¹

Maintain excellent image quality

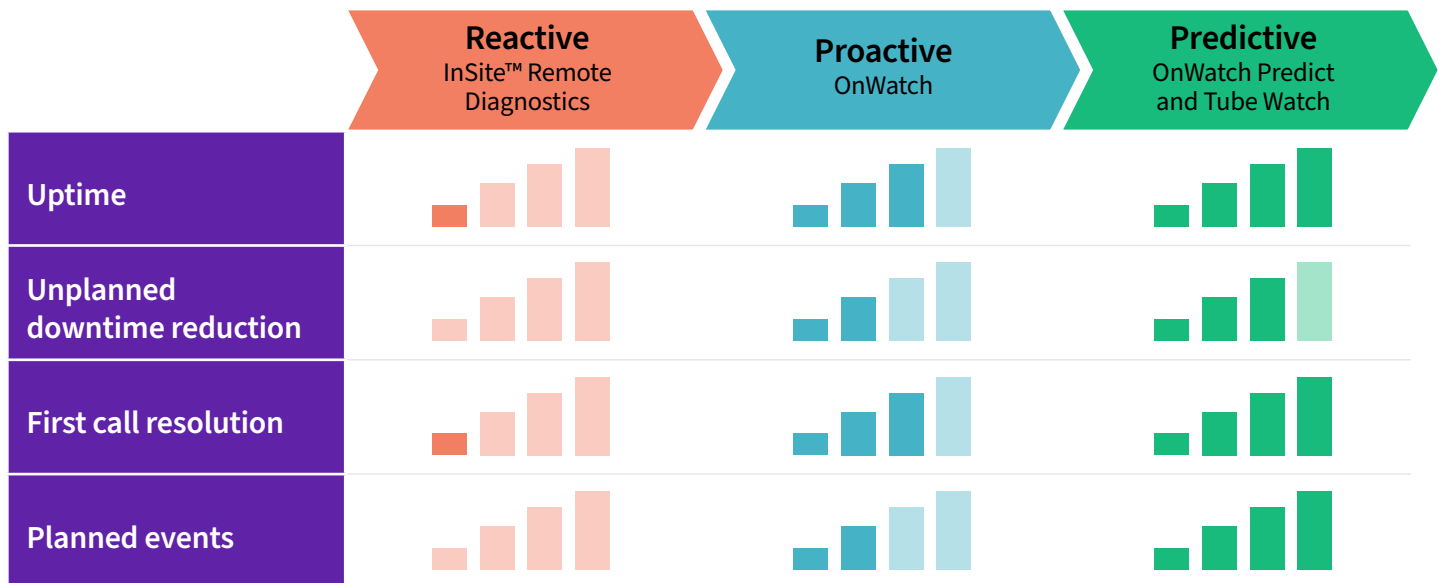

Gain insight to minimize unplanned downtime and better plan necessary service

With a depth of knowledge you can only get from the company who developed the medical devices, we track key system metrics and use Artificial Intelligence to predict how and when an issue might arise.

Whenever you get a preemptive alert, you can promptly start troubleshooting, diagnosing and fixing the issue. Or, you can use our remote diagnostics to craft a data-backed plan for the service event. You can then order any necessary replacement parts in advance, and schedule that maintenance activity when it works best for you.

With clinical partners, operations leaders and patients all counting on you, count on GE HealthCare and our suite of proactive and predictive monitoring solutions to elevate your expertise beyond reactive break/fix services, and help you take control of complex equipment maintenance challenges.

Our proactive and predictive services are available for a wide range of GE HealthCare imaging products. Ask your GE HealthCare representative to learn more today about how we can empower you to thrive behind the scenes.
