

# Genesis™ Radiology Workspace

Powered by View

## One Workspace. One Viewer. Built for Modern Radiology

**Radiology demand is rising. Complexity is growing. Systems are fragmenting focus.**

Imaging teams are navigating increasing volumes, tighter staffing, and disconnected tools that slow momentum and add cognitive load, impacting efficiency, confidence, and care delivery.

### A Unified, Cloud-First Radiology Workspace

Genesis™ Radiology Workspace<sup>1</sup> brings diagnostic viewing, workflow, visualization, and orchestration into a single, cohesive experience, so radiologists, clinicians, and IT teams can move through the day with greater consistency and confidence.

Built on GE HealthCare's imaging expertise and powered by AWS, Genesis Radiology Workspace modernizes enterprise imaging without disruption, scaling as needs evolve and enabling faster innovation without rebuilding existing infrastructure.

#### View

- Designed to keep you in the flow
- Smart Reading Protocols learn preferences & reduce setup time
- Advanced visualization (MIP, MPR, VR, segmentation) built in
- AI results surfaced directly in the reading workflow
- Zero-footprint, browser-based access from virtually anywhere

**Results:** fewer clicks, less context switching, more confident reads.

#### Workflow Manager

- Keep studies moving
- Intelligent coordination of worklists, prioritization, & assignment
- Reduced manual steps and balanced workloads as volumes shift

#### Enterprise Archive

- Built for Scale and Continuity
- Secure, cloud-enabled storage across the enterprise
- Simplified access, long-term data availability, & growth readiness

## Measurable Impact —Starting Now

#### Clinical

Helps with faster reading and improved diagnostic confidence. Flexibility to read from more locations without compromise

#### Operational

Streamlined workflows across radiology, IT, and care teams  
Simplified upgrades and centralized cloud management

#### Financial

Lower upfront capital investment with subscription scalability  
Reduced over-provisioning and unused capacity  
Lower downtime costs through resilient cloud operations

# Genesis™ Radiology Workspace

## Why it Matters

**Designed for the Real Pressures of Modern Radiology**  
Genesis™ Radiology Workspace helps reduce workflow friction, support compliance, and create a more sustainable radiology day, without adding burden to clinicians or IT.

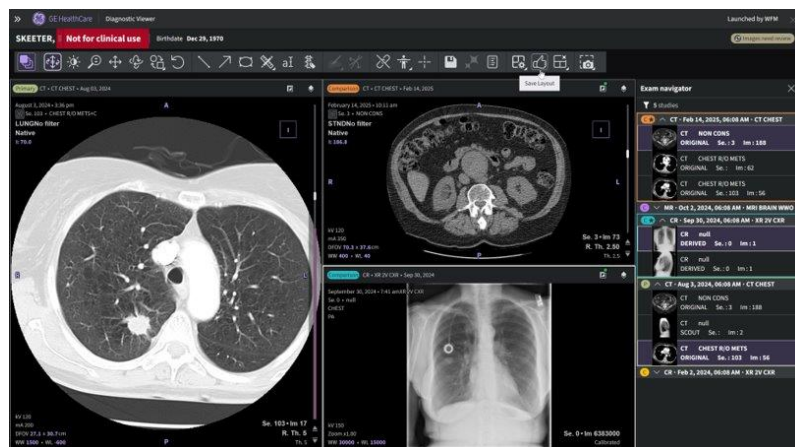

## Ready for What's Next

**Secure. Scalable. Trusted.**

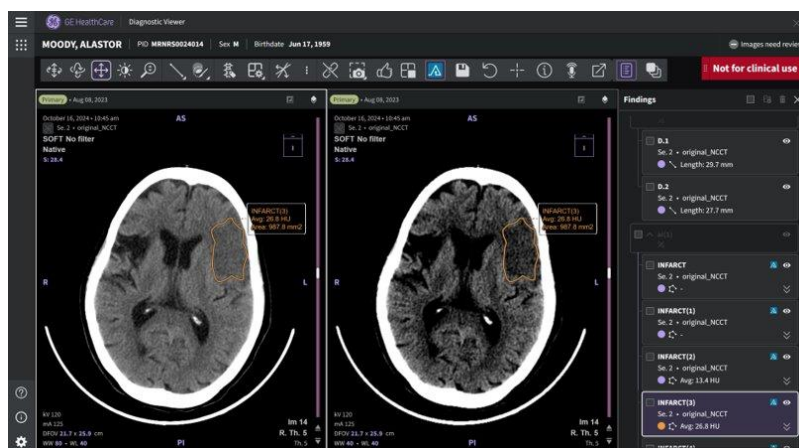

Powered by AWS, Genesis delivers enterprise-grade security, high availability, and resiliency, so teams can stay focused on clinical decisions, not system maintenance.

## Let's Make Radiology Work More Manageable.

Connect with GE HealthCare to see how Genesis™ Radiology Workspace can streamline workflows and support what comes next.

**Smart Reading Protocols** save time by automatically applying the best layout for each study using machine-learning-based context matching, while continuously learning user preferences to deliver consistent, personalized image display without manual adjustments.

**AI enabled workflow<sup>2</sup>** integrates AI-generated findings directly into View, allowing radiologists to review, edit and delete AI insights without switching applications. This seamless in-viewer access helps save time, reduce cognitive load, and support more confident diagnostic decision-making.

1. Available only in USA and UK.

Genesis Radiology Workspace is a solution that consists of View, Workflow Manager and Enterprise Archive.

2. AI findings are generated by 3<sup>rd</sup> party applications.
