

GE HealthCare Technical Training

Help get the best from your brightest.

GE HealthCare

A high standard of training

Maintaining your equipment is essential in a healthcare environment, helping to promote efficient operations, increased uptime, and enhanced patient experience. Unfortunately, it's not always that simple. When your equipment needs servicing, costs and downtime can escalate quickly. A solution? Leverage the comprehensive portfolio of technical training available with GE HealthCare to bring the service capabilities you need in-house.

Designed for hospital professionals responsible for operating and maintaining equipment, GE HealthCare Technical Training is here to help you solve this challenge. Tailored to fit your needs, we deliver world-class training designed to give your staff the knowledge and skills to help enhance your team's proficiency and capabilities in servicing and maintaining GE HealthCare equipment.

Flexible education to meet your needs and get results

Learn your way with GE HealthCare

In Person (GE HealthCare Institute): In-depth training provided at our GE HealthCare Institute in Waukesha, WI. Depending on course selection, students may be trained to perform levels of service ranging from routine maintenance to complex repairs.

Virtual: Virtual, instructor-led courses offer the convenience of learning new skills through a mix of instructor-led and skill-based activities.

In Person (customer location): Our expert instructors will travel to your preferred location to provide in-person knowledge and hands-on training. We offer the same optimal experience that a student would receive at the GE HealthCare Institute with the added benefit of our instructors traveling to your location versus your staff traveling. Beneficial for larger team trainings as overall training costs may be reduced.

Online: Online, self-paced courses provide flexibility and convenience for your team members to learn at their own speed.

Breadth and depth

GE HealthCare offers over 250 courses through four delivery options: In-person (GE HealthCare Institute), Virtual, Online, or In-person (customer or regional location) designed for flexibility and convenience to align with your staffing demands and schedules.

OEM-quality

When you enroll in one of GE HealthCare's education programs, you train alongside our own GE HealthCare Field Engineers, giving you confidence that you're getting OEM-quality education and top-notch technical skills.

Instant document access

After training, benefit from instant access to technical service documentation available online.

Multi-vendor training

At GE HealthCare, we don't just provide training for our own equipment — we offer training for equipment manufactured by other OEMs through our multi-vendor classes as well.

GE HealthCare

Your partner in education

Enhance and advance your technical service training
